Use Leverage and Compounding

Let me start off with what should be obvious. There are NO sure things on the Internet, it's a lawless frontier! However, the potential is enormous and this plan will show you how to minimize your risk.

In order to control that risk, the first program only requires a one time \$5 payment out of pocket, the rest is all generated from profits. The key to earning more is to find a way to bring more people into the program as your customers. That's the purpose of detailing this plan in a document you can easily duplicate.

To get your edited copy of this document into as many hands as possible is just as easy, since there are THOUSANDS of people online every day desperately searching for exactly what we have, a low cost low risk method to easy income.

There are plenty of matrix programs and risky ventures that milk you for a small monthly payment and promise to help you build a "downline", but I assure you that most of them fail for most people and even if you succeed in getting a few referrals, they quit as soon as they get tired of paying without any return. This first program has no downline and payments are made directly to YOU, so there is no waiting for any program owner to see if he can afford to pay you this month.

As it starts paying, you take part of the proceeds and reinvest in your next level to increase your product line, then take another part and buy advertising that pays you rebates 200% greater than your cost. That has the potential to get a few more customers, while it adds to your total income in the process.

You should still spend some time promoting and I suggest Social Networks where you can meet like-minded folks that have similar problems to your own. I also use videos on YouTube, but before you say you can't make a video you should visit PreSaleVideo.info

So Does It Work?

Here's a screenshot of my back office statistics. Keep in mind since there are no monthly payments, there is NO TIME PRESSURE and people NEVER quit!

My cost for my own product was \$5, \$10, \$25, \$50 and \$100 for \$190 total. That means I had \$280 profit which is what I started the second program with. I bought \$260 in advertising spread over the first two months to assure myself it would be worth it, then I started cashing out until I recovered my initial cost. Now I only cash out 50% of my rebates each week and \$100 of my referral earnings, which puts \$250 a week or \$1,000 a month in my pocket and still grows my balance and in turn my weekly rebates, all on "House Money" which is risk free.

This process has expanded my balance to over \$2,500 in less than 6 months.

Some updated shots **1 WEEK LATER** after using this PDF to promote with. I cashed out the \$250 for my \$1,000 a month income, increased my Gift Income by another \$110 with no expense and added \$286.90 to my Ventures.

That's \$646.90 increase in 1 Week for over \$2,500 a month average.

There are many who will say that screenshots are worthless, because they are too easy to doctor up with Photoshop, but let me suggest a method you can be assured is certain. Enroll in Ad-Ventures4u with a link below, then logon to your own back office and look for my ID# in the reports yourself. Follow me a few weeks as you build the rest of your plan.

Now here's a shot of my AlertPay register showing payments from Steve Smith who is the owner of Ad-Ventures4u.

So that's the plan. No it's not overnight riches, but once you have \$1,000 a month coming in, it changes your entire paradigm. If you earn other income online you can feed the advertising with, it will shorten the time until more ways to make money are naturally attracted to you. This is just the beginning.

First enroll with the first program for a one time \$5 [Click Here](#)

You will need an AlertPay account if you don't have one. [Click Here](#)

Then enroll in Ad-Ventures4u free and buy Ventures as you grow. [Click Here](#)
